

Charlie Arehart

Charlie Arehart is an independent consultant (operating under CArehart.org) who is an experienced server troubleshooter with more than 35 years' experience in Enterprise IT. For nearly 25 years he has served (and helped lead) the ColdFusion community in many ways, including teaching, writing, speaking at user groups and conferences, organizing community resources, and more. He's recognized as an Adobe Community Professional for CF. For the first 15 years of his career, Charlie brought that same energy and focus to the development community of a mainframe DBMS, Model 204, consulting to many federal and defense agencies using some of the largest databases in the world.

For the past 15 years he has focused on assisting companies of all sizes and experience levels with CF server troubleshooting, tuning, installation, configuration, administration, migration, and security, providing mostly remote, short-term consulting. More at carehart.org/consulting. (**Recruiters:** Charlie is NOT seeking full-time roles, CF development roles, nor any work with M204.)

Experience

2006-present	Independent Consultant	Various clients	Jamestown, KY
	<ul style="list-style-type: none"> Providing troubleshooting, tuning and more regarding ColdFusion web application deployments for clients worldwide, including Fortune 100 companies, government agencies, hosting companies, and the SMB market.
